DISTRIBUTED GENERATION SUMMARY REPORT FOR 2012

Project No. 41090

**Summary of Annual Filings by Electric Utilities of
Interconnected Distributed Generation Facilities to Comply
with Substantive Rule 25.211(n)**

Substantive Rule 25.211(n) requires that by March 30 of each year, every electric utility shall file with the Commission a Distributed Generation Interconnection Report for the preceding calendar year that identifies each distributed generation facility interconnected with the utility's distribution system. The report shall list the new distributed generation facilities interconnected with the system since the previous year's report, any distributed generation facilities no longer interconnected with the utility's system since the previous report, the capacity of each facility, and the feeder or other point on the company's utility system where the facility is connected.

Centerpoint Energy Houston Electric ("CenterPoint"), Oncor Electric Delivery ("Oncor"), AEP Texas Central Company ("AEP TCC"), AEP Texas North Company ("AEP TNC"), Texas New Mexico Power Company ("TNMP"), Entergy Gulf States ("Entergy"), Southwestern Public Service Company ("SPS"), Sharyland Utilities ("Sharyland"), Southwestern Electric Power Company ("SWEPCO"), and El Paso Electric Company ("EPE") reported a net total of 774,630 kilowatts ("kW") of distributed generation ("DG"). During 2012, 193,520 kW were added to the 2011 total of 730,255 kW capacity, and 5,771 kW of DG were disconnected. The most common technology used for DG in Texas is diesel generation, with wind generation ranking second.

*The "Other" category includes such fuel technologies as: Biodiesel, Landfill gas, Biomass, Wood, and Lignite.

Total DG for each utility in kW for calendar years 2006, 2007, 2008, 2009, 2010, 2011, and 2012 are shown in Table 1.
